SHRUBS

Amorpha Fruticosa. Common False Indigo. A tall native shrub of very easy cultivation, blooming freely in June. The violet spikes are crowded in terminals. Of rapid growth.	6 to 12 in.	15	40	\$3 00	\$25 00
	1 to 2 ft	20	50	4 00	35 00
	2 to 3 ft,	30	80	6 00	50 00
	3 to 4 ft.	40	1 25	10 00	

ALTHEA, or Rose of Sharon.

These are grand flowering shrubs. There is a wide range of color, and not a day from the middle of July until September—a time when so few other shrubs are in bloom—that Altheas are not aglow with flowers. They have no insect enemies, grow well anywhere, are splendidly suited for shrubbery borders, for colony plantings and hedges. The planter who uses them freely makes no mistake.
